

Software Engineer (enterprise applications and data integration)

Most of our stack is around Java but we are using and we are investigating other languages (e.g. Javascript, Groovy) and tools. We are interested in candidates who have strong understanding of Object Oriented Programming and solid background on software engineering principles. We value and use open source technologies and tools, and in many cases we contribute back to the community.

Below there is a not-complete list of technologies we use:

- Java, Javascript, Groovy
- IBM DB2, Microsoft SQL-Server
- Hibernate, JDBC
- Maven, Gradle, Ant
- SOAP, REST
- Junit, TestNG, Spock, Selenium
- IBM Websphere Application Server, IBM Webshpere Portal, Liferay
- Apache Wicket, React.js
- Git, Subversion
- Active MQ
- IBM API Connect
- Jenkins, Urban Code
- Apache HTTP Server
